So we put it to the ultimate test, digging into the archives of past winners of our *Grazia Young Fashion Awards* and creating looks spanning over several design philosophies and seasons. Here's to chronicling the fact that irrespective of evolving culture, style and trends, it's possible to blur lines and still look current.

*Our opening image of models Irene, Teesta and Tashi is symptomatic of the fact that the Indian fashion and beauty industry is opening up to the idea of diverse faces and skin tones. As make-up artist Elton Fernandez put it, "The goal is to be all inclusive. Anjali (Lama, left) is leading the story for models. You're looking at transwomen today – you see them as women. Which is what they are and what they hope to be identified as. For me that's a big change in itself, that's empowerment. We're also learning to appreciate our own colour more." He talks about how he hears less of 'make me look fair.' Indian women now get what bronzer is going to do to them. They get that contouring is not going to make them look darker, that a deeper shade of lip colour is not 'auntie' any more.*

*And at the same time, women are also more nurturing of themselves, choosing natural ranges like Nandeeta Manchanda's (above) *Enn's Closet*, that excels in skincare and cosmetics, all made from natural ingredients.*
